FLEXA MINI – Where the space is very small

THE A4 FLEXA MINI is a flexible platform lift which is a favourite among architects and engineers, because it can be fitted into very small spaces. Especially developed for department buildings and private homes, the A4 Flexa Mini is excellent for both indoor and outdoor environments. For almost any living space where you need freedom and increased accessibility- A4 Flexa Mini is a great solution!

A4 FLEXA MINI is a screw driven vertical platform lift with self supporting shaft enclosure. When other lift types need construction work, pit, machine and head room, the Flexa Mini demands minimum space and effort. The lift is easy to install and is delivered with a prefabricated shaft made of steel or laminated safety glass panels. Personalise your A4 by choosing your own RAL colour, glazing or simply any number of the different safety features.

THE A4 FLEXA MINI is EC-type tested and certified by the Notified Body DNV (Det Norske Veritas) according to the European Machinery Directive 2006/42/EC and the forthcoming European Standard for platform lifts.
