SOLUTIONS FOR THE LIFT INDUSTRY

A PASSENGER LIFT PACKAGE
ENGINEERED FOR
LIFT PROFESSIONALS

WHY CHOOSE OUR PASSENGER LIFT PACKAGE?

Building a passenger lift package can be incredibly complex, time-consuming, and requires extensive knowledge and experience. That's where we come in. Our passenger lift package is meticulously crafted to take the burden off your shoulders, allowing you to focus on what you do best while we handle the intricacies.

Furthermore, at the core of the passenger lift is the latest and most advanced lift control system from DMG, renowned for its reliability, quick installation, intuitive operation, and user-friendly interface.

Simplifying the Complex

Passenger lift packages present numerous technical challenges and require a comprehensive understanding of both mechanical and electrical systems. Our team has decades of experience and the specialised expertise to navigate these complexities efficiently. By selecting our package, you can avoid the hassle and potential pitfalls associated with managing the process yourself.

Expertise and Accreditation

Assembling and installing a passenger lift package requires the correct accreditations and certifications. Achieving these credentials can be a lengthy and costly process. Our team already holds all necessary accreditations, meaning you can trust us to deliver a compliant and safe installation without the additional expense of obtaining accreditations yourself.

Peace of Mind

With our passenger lift package, you get more than just a product—you get peace of mind. We manage the entire process from start to finish, ensuring that every aspect meets the highest standards of quality and safety. Rest assured that your lift will operate reliably and comply with all relevant safety standards. Additionally, be sure the lift is installed correctly when you choose us to install it on your behalf.

Choose our passenger lift package for a seamless, efficient, and worry-free solution to your vertical transportation needs. Let our expertise work for you, providing a superior lift experience without the associated complexities.

HIGHEST
STANDARDS OF
QUALITY AND
SAFETY

ENGINEERED FOR LIFT PROFESSIONALS.

Our passenger lift range seamlessly combines industry-leading mechanical and electrical components with our extensive experience and expertise. At the heart of each lift is the latest and most advanced lift control system from DMG. This state-of-the-art control system ensures unparalleled performance, whether in new installations or modernisation projects.

Our premium package lift is designed for performance, reliability, and ease of installation, featuring high-quality components from industry-leading manufacturers:

- **DMG PB4 Lift Controller** – Fully pre wired for faster installation and seamless operation.
- **Blain EV100 Valve Block** – Precision control for smooth hydraulic lift performance.
- **Lift Machine Options** – Choose from a selection of high-quality VVVF gearless machines.
- **Premium Car & Landing Doors** – Fermator Premium or Wittur Hydra for durability and style.
- **Luezar Overspeed Governor** – Ensuring safety where applicable.
- **DMG Dardo Push Buttons** – Sleek, responsive, and built to last.
- **DMG Raffaello 4" TFT Indicators** – Clear, modern landing displays.
- **Customisable Car Interiors** – A variety of high quality finishes to suit any environment.
- **Avire Panachrome Safe Edges** – Enhanced door safety with intelligent detection.
- **7" Giotto TFT with Voice Announcer** – A premium in-car display with voice guidance.
- **Memcom Autodialler** – Reliable emergency communication for passenger safety.

With high-performance technology, premium materials, and expert support, package lift is the ultimate solution for lift professionals looking for quality and efficiency.

Tailored to Your Project

Our passenger lifts are available in a wide range of contemporary styles and finishes, allowing them to integrate seamlessly into any environment. Whether your client is seeking a sleek, modern design that complements a corporate office, a classic and elegant finish suitable for high-end residential buildings, or a durable and functional aesthetic for public spaces, we offer a range of options to suit their needs. For buildings with space constraints, EN81-21 compliant low headroom and shallow pit options are also available, ensuring flexibility without compromising on style or safety.

With a selection of high-quality materials, colours, and textures, you can customise everything from car wall panels and flooring to handrails and lighting, ensuring the lift complements its surroundings perfectly. Our tailored solutions not only enhance the passenger experience but also add value to the building, combining style, durability, and performance in every installation.

Whatever your design requirements, our expert team is here to help you create a lift that meets both practical and aesthetic needs. From full-size standard solutions to compact low headroom and shallow pit designs, we can help you find the right option for your project.

TAILORED ELEMENTS OF OUR INTERIOR

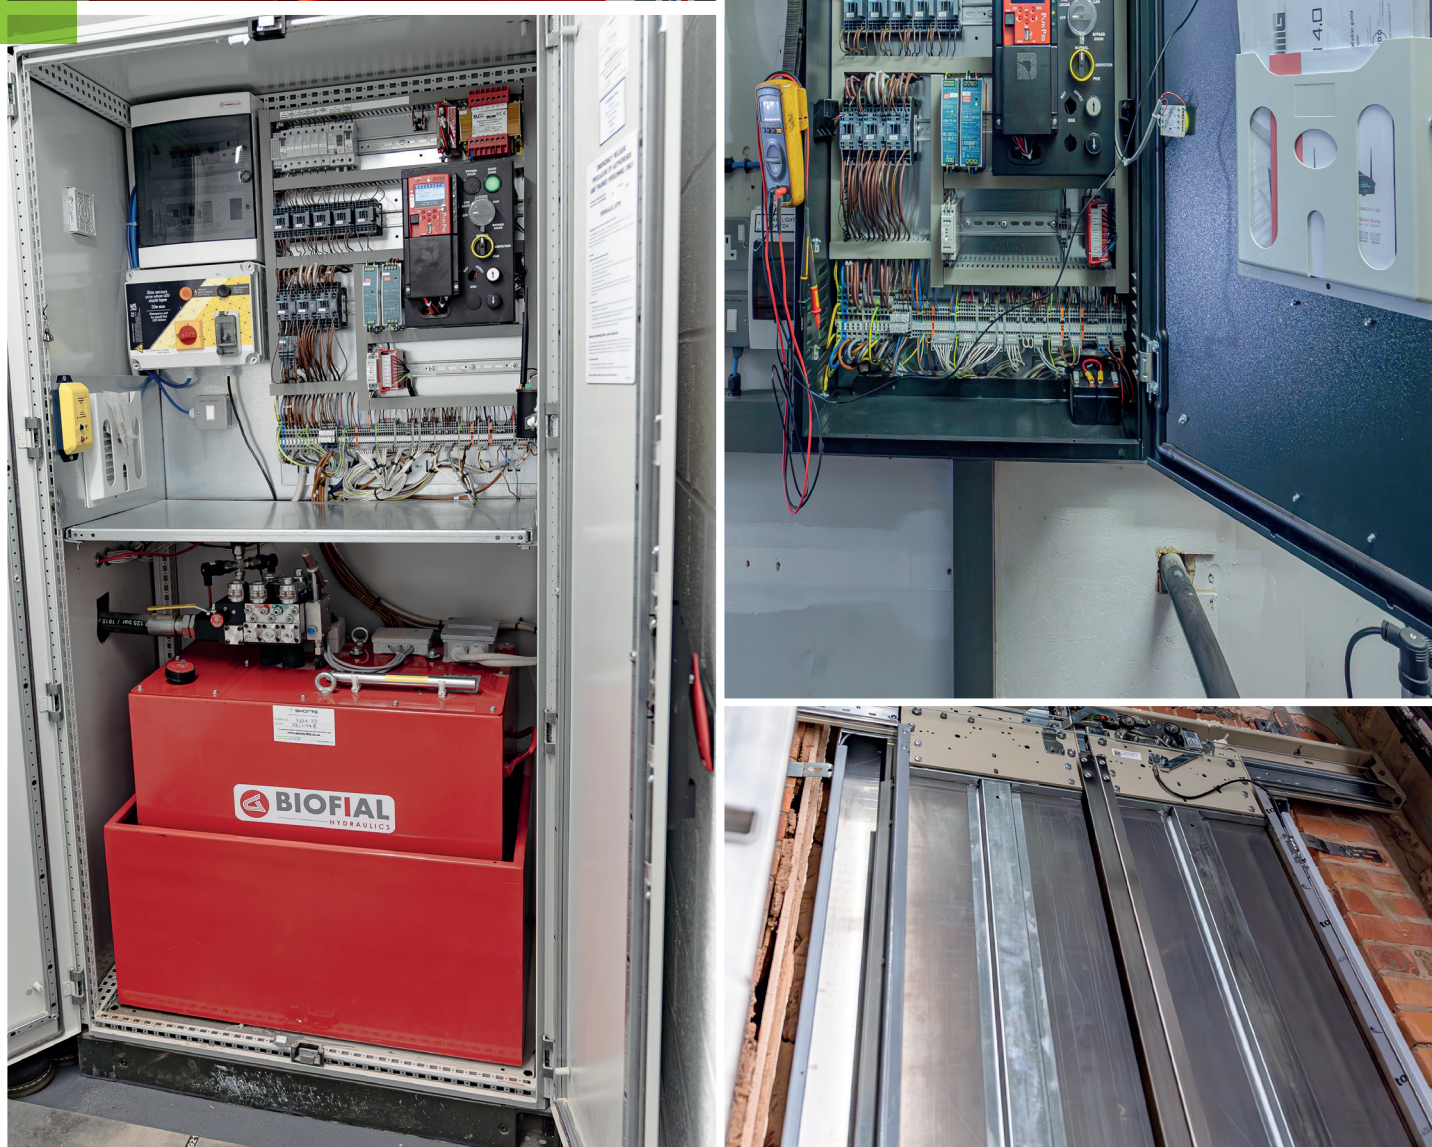

Uncompromising Safety Standards

Safety is our top priority. Our lifts are designed and manufactured to meet the highest industry standards, ensuring exceptional reliability and passenger protection. We strictly adhere to EN81-20 and EN81-50 regulations, which set the benchmark for modern lift safety, performance, and durability.

These rigorous standards cover every aspect of lift design, installation, and maintenance, including:

- **Structural integrity** – Ensuring robust construction for long-term reliability and durability.
- **Advanced safety mechanisms** – Protecting passengers in all operating conditions.
- **Fire Safety** – Two-hour Fire Rating in accordance with EN81-58 for the landing doors.
- **Precision engineering** – Guaranteeing smooth, controlled operation with minimal risk.

By choosing our fully compliant lifts, building owners and lift professionals can have complete peace of mind, knowing that every component has been meticulously tested to provide a safe, secure, and comfortable experience for all users.
